You never thought you'd wear a two-piece again.

You get plenty of exercise, watch your diet, but there's still those "problem areas" that resist the hours spent on the treadmill. We can help. VASER LipoSelection® uses state-of-the-art ultrasound technology to reshape your body by selectively breaking up and removing fat deposits. At the West Institute, we use local anesthesia in our luxurious new space for a kinder, gentler procedure. Choose LipoSelection, not traditional liposuction.
